

The Beauty of Marvin – With a Tax Credit

\$1,500 Stimulus Package Tax Credit Now Available

The recently passed Economic Stimulus package (the American Recovery and Reinvestment Act of 2009) includes federal tax credits that encourage homeowners to make energy efficient improvements to their homes. Replacing windows and doors with energy efficient Marvin products qualifies for this tax credit! Please visit marvin.com to see our products and options that will meet the tax credit requirements and for detailed product specific data.

Details of the Tax Credit:

1. The tax credit is based on 30% of the cost of the qualifying windows and doors, up to \$1,500. The installation of the windows and doors does not qualify for the tax credit.
 - For example, a purchase price totaling \$5,000 of qualifying products will receive the maximum tax credit of \$1,500.
 - Not all products in the project are required to meet a 0.30 U-Factor and 0.30 SHGC. Therefore, \$5,000 of product that does qualify can be used with product that does not, yet the homeowner receives the maximum tax credit.
2. The credit is available on projects completed in 2009 and 2010. (Total of \$1,500 over the two year period.)
3. The credit applies to the homeowner's principal residence only.
4. Window and door performance must be equal to or below a U-Factor of 0.30, and a Solar Heat Gain Coefficient (SHGC) of 0.30 or lower.

How to Qualify:

1. Replace old windows and doors with qualifying Marvin products between January 1, 2009 and December 31, 2010.
2. Save the purchase receipt and all NFRC and/or ENERGY STAR labels from the windows and doors installed.
3. Improvements made in 2009 can be claimed on the homeowner's 2009 taxes (filed by April 15, 2010)
